San Francisco
Treasury Symposium

San Francisco Treasury Symposium Speakers,

Back by popular demand, we will be using Slido for all sessions at the 2024 San Francisco Treasury Symposium! This means you can incorporate the following features LIVE into your presentation,

- Multiple choice polling
- Audience quiz
- Open answer questions
- Ranking
- Audience Q&A

It is simple for attendees to use. Either follow the QR code or attendees enter your session code at slido.com and immediately have access to active polls or ask a question virtually.

It is easy for presenters as well, just activate a poll for attendee feedback, then click the present button to immediately show results real time on the screen for everyone to see.

If you aren't familiar with Slido, you can view a 2 min. tutorial of features at https://youtu.be/iLLS-43c4vg.

This is completely optional. There are 2 ways you can engage with the software.

1. Send me the polling questions you would like built **by NOON on Friday 5/10** and I will create them for you. Your SFTS liaison can help run the features of Slido during your session.

2. We can provide you with our guest login and you can create your own questions either in advance or real time.

There will be a laptop at each podium running your provided PowerPoint presentations, this can be used to make results live for your audience. If you prefer to use the feedback for moderator viewing only, please be sure to bring a second device (laptop, iPad, smartphone). As a reminder, you must use the attached PowerPoint template for all presentations at the conference.

You may be wondering how you introduce your use of Slido at the start of your session, here is a great example of Slido being used in a conference setting. https://youtu.be/msVFcrBEU1M

This is meant to build audience engagement and provide additional tools for you to enjoy. This isn't meant to cause stress. If you don't find this to be helpful, please opt out and continue with your presentation as planned. Added benefit for those interested, and no response necessary for those who aren't.

Please feel free to reach out if you have any questions or would like to begin building Slido into your presentation.

All the Best,
Your Conference Planning Team
